Relax you have...

Dataprotect
Remote Backup Service

Smart businesses today understand the importance of having a reliable backup system for their company's mission critical data. Human error or a system malfunction can make catastrophic data loss a real possibility. Don't leave your company's vital information vulnerable with outdated or inadequate data backup.
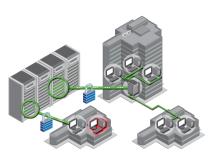

Let our helpful support staff personally assist you live online with setting up Dataprotect for automatic backups for individual or multiple computers. Don't be left unprotected.
Desktop License fee:	$4.95/mo
Server License fee:	$9.95/mo
Storage Cost:	$.40/GB/mo

Easy To Use

- **Simple to setup**
  The Dataprotect interactive web console makes it a breeze to set up and control which files to backup and how often to do it. No programming skills are needed.

- **Let us set it -You forget it**
  LVA Live Virtual Assistance - Allow us to remotely access your computer's desktop and install, and set up the Dataprotect software for you. We can either talk with you over the phone or through a chat window to setup your specific backup parameters.

- **Requires no new hardware**
  Our web based application means you no longer need to purchase, maintain or upgrade your own backup hardware and software.

- **24/7 live customer service**
  We work day and night with the commitment of making your experience a good one.

Safe and Secure

- **448-bit military-grade encryption**
  This is the same security level that banks use today to eliminate prying eyes.

- **Data Center is suitable for clients with PCI compliance requirements**
  This helps to ensure your payment and credit card information is totally safe.

- **Managed by certified ISC2 IT personnel**
  Our skilled staff prescribes to a high code of professional ethics and security standards.

- **Your data stored locally, not overseas**
  Unlike other data backup companies, your important data is stored locally.

Affordable Value

- **Competitively priced options**
  We provide backup service for individual computers as well as for multiple servers.

- **Only buy what storage you need**
  We can customize the right size for you starting at 10GB up to 2,000 GB.

- **The cost of recreating lost files**
  It can cost thousands of dollars in lost time and revenue to recreate lost files.
